

## CIBSE Training Online learning benefits

**Does not require you to travel.** You can log into your CIBSE online learning account from anywhere you want: home, work or whichever place you find comfortable and easy to access.

**Offers you time flexibility.** You can dip in and out of an online learning module whenever you want and fit your personal development within your busy schedule.

**Interactive content.** CIBSE online learning has quizzes and supporting visuals to keep you captivated along your learning journey.

**Counts towards your CPD hours.** Each core engineering module is worth seven CPD hours, and the digital engineering modules are worth two CPD hours.

**Helps you understand your mistakes and improve.** If you answer a question incorrectly, the online learning platform will link it to the relevant topic. This way you can review it, understand your mistake, and learn from it.

**Accessible content.** The content of each module was designed to enhance the learning journey: the topics are broken into sub-topics, improving the flow and making it more organised and memorable.

**Complimentary knowledge items.** If you purchase the digital engineering series, each module comes with a complimentary publication to support your learning experience.

**Price discounts.** If you are a member of CIBSE, you benefit from a 15% discount on all online learning.

- **In-house Training**

Training multiple staff at once provides the opportunity for your organisation to have a training package crafted to your specific needs. In-house training can help your organisation overcome challenges and fill the skills gaps in your workforce. Courses run on a minimum number of six staff\*.

For an In-house quote please email the following information to [training@cibse.org](mailto:training@cibse.org):

1. Name of course
2. Approximate number of staff
3. Your site address

*\*Minimum numbers for in-house courses outside of the UK may vary*
