1. **Underpinning science and mathematics and associated building services engineering disciplines, will normally include:**
   - Knowledge and understanding of the scientific principles underpinning relevant current technologies, and their evolution
   - Knowledge and understanding of mathematics necessary to support application of key engineering principles

#### Assessment of area 1
(please circle one)
- strong
- adequate
- weak/absent

2. **Engineering analysis, will normally include:**
   - Ability to monitor, interpret and apply the results of analysis and modelling in order to bring about continuous improvement
   - Ability to apply quantitative methods and computer software relevant to building services engineering, frequently within a multidisciplinary context
   - Ability to use the results of analysis to solve engineering problems, apply technology and implement engineering processes
   - Ability to apply a systems approach to engineering problems through know-how of the application of the relevant technologies

#### Assessment of area 2
(please circle one)
- strong
- adequate
- weak/absent

3. **Design awareness, will normally include:**
   - Knowledge and understanding of problems, constraints, solutions and adaptations to meet user needs
   - Ability to ensure fitness for purpose (operation, maintenance, reliability etc)

#### Assessment of area 3
(please circle one)
- strong
- adequate
- weak/absent
