</table>

### Session 1
- How to implement BIM in your company
- Brief introduction to the standards that define what BIM Level 2 involves
- RIBA Stage 0: What needs to be done before we start work
- Organisation, Asset and Project information requirements worked example
- Employer’s information requirements
- RIBA Stage 1: Setting the brief in a digital way, engaging with as wide a team as possible
- BIM Execution Plan
- Master and Task information delivery plans

### Session 2
- RIBA Stage 2: Concept design
- What are LoD and LoI?
- Concept systems and analysis, how much is enough?
- PDTs and BIMHawk
- RIBA Stage 3: Developed design
- How to do clash detection properly
- Deliverables that make themselves

### Session 3
- Interactive discussion
- Work Stages 4 & 5
- Moving data from design to calculation packages and back again
- Easy plant replacement strategies
- RIBA Stage 5: Construction
- Design to fabrication workflows
- Product substitutions made easy

### Session 4
- RIBA Stage 6: Handover and Close-out
- Project to Asset information models
- COBie exchange
- RIBA Stage 7: In use
- Planned maintenance
- Asset churn
- Future gazing, what might happen with BIM Level 3, internationalisation…

“The interface between designers..., contractors and users of a facility are well documented, but how this is actually done has not been shown before; this roadshow will help all those involved.”

- Dwight Wilson, Digital Engineering Manager, Imtech
